Previous History Dose Report

LEGEND

1. Customer ID for which the report is generated. Note that the Customer ID is not the same as account number. Multiple accounts and subaccounts belonging to the same customer can be grouped under the same Customer ID.
2. The Participant Name and Number.
3. The dates for the specific exposure period.
4. The total dose received during the current year including the previous history dose.
5. The total lifetime dose, including the previous history added on to this report, for the specific participant.
6. The date the participant started being monitored by Landauer at the current customer.

GENERAL FACTS

- **Purpose:** The Previous History Dose Report is generated once dose history records are entered for specific participants.
- Previous history entries occur at the customer's request. It is generally for new customers that are shifting their occupational radiation monitoring program to Landauer or for existing participants that were monitored by a previous employer.
- This report is generated the next day after a previous history dose is entered.
- The report is generated and mailed to the primary reporting address at the customer level.

FREQUENTLY ASKED QUESTIONS

Can Landauer automatically transfer my doses from a previous employer's account to my new account?

The dose can be transferred with proper documentation. The employer can request the previous dose records for a participant from his or her previous employer. Once the data is received, the request to add previous dose history must be sent in writing to the Dosimetry Records Department to be completed.

How do I submit a previous history addition to Landauer?

Requests must be submitted in writing to the Dosimetry Records Department via mail, fax, or email.

Will these doses be reflected on my Radiation Dosimetry Report?

Yes, any dose added for the current year will be added to the Year to Date (YTD) and Lifetime Dose (LTD) columns. Any dose from prior years will only be added to the LTD column.

Can Landauer add previous history doses to a new participant, and have those doses reflect on an Equivalent Form 5?

Yes. When submitting previous history dose requests, an Equivalent Form 5 from the previous year can also be generated for the participant.
